

## Learning Centre

Want to know how weather forecasts are made, how to tell your stratus cloud from your cirrus, or what an anticyclone is? You've come to the right place.

We are building a library of weather knowledge covering everything from thunderstorms to computer models. We'll be adding to this learning centre over the coming months so if you've got a weather question or a meteorological mystery you want solved send your question to [weather@metservice.com](mailto:weather@metservice.com)

Sun Dog

22° Circular Halos

Circumzenithal Arc

Corona

Cloud Irisation

Anti-Crepuscular Rays

Crepuscular Rays

Rainbows

## Weather Types

Lightning

Mugginess

Sea Breeze

Foehn Wind

Convergence

Thunderstorms

Severe Thunderstorms
