1. LOWER TROPOSPHERIC RELATIVE HUMIDITY

2. UPPER LEVEL LOWS

3. ADVECTION ASSOCIATED WITH MID-LATITUDE CYCLONES

4. THE FORECASTING OF DEW

5. THE FORECASTING OF FROST

6. OUTFLOW BOUNDARY CHARACTERISTICS

7. FORECASTING ICING ON ROADS

8. CHARACTERISTICS OF LOW-LYING FOG

9. DEW / FROST THICKNESS FUNCTIONS

10. THE IMPORTANCE OF FRICTION

11. THE SEA BREEZE

12. COLD FRONT MODIFICATION

13. MID-LATITUDE CYCLONE STRENGTHENING

14. PRESSURE TROUGHS AND SHORTWAVES

15. FORECASTING SYNOPTIC SCALE PRECIPITATION

16. DEWPOINT AS A FORECASTING TOOL

17. WIND AS A FORECASTING TOOL

18. CHANGES IN ATMOSPHERIC PRESSURE

19. UNDERSTANDING LATENT HEAT

20. IMPORTANT CLIMATOLOGICAL FACTORS

21. SOIL MOISTURE AND FORECASTING

22. RADIATION FOG INGREDIENTS

23. TORNADO SAFETY

24. LOWER TROPOSPHERIC ANALYSIS

25. FORECASTING USING THE 500 MILLIBAR CHART

26. JET STREAM ANALYSIS

27. CORIOLIS FORCE INTERPRETATION

28. CONTRIBUTING FACTORS TO INSTABILITY

29. BASIC EQUINOX DEFINITION

30. TEMPERATURE PROFILE OF THE TROPOSPHERE

31. SUPERADIABATIC LAPSE RATE

32. UPWIND AND DOWNWIND DEFINED

33. AN ADIABATIC VERSUS A DIABATIC PROCESS

34. ALBEDO AND THE ENERGY BUDGET

35. THE SOIL MOISTURE'S IMPACT ON WEATHER PREDICTION

36. THE 6 FACTORS THAT INFLUENCE HUMAN OUTSIDE COMFORT

37. METEOROLOGICAL SENSOR TYPES

38. ISOPLETHS DEFINED

39. THE DIFFERENCE BETWEEN TEMPERATURE AND HEAT

40. ATMOSPHERIC WATER VAPOR

41. WARMING AND COOLING OF THE EARTH'S SURFACE

42. SUPERCCELL TYPES: LP, CLASSIC, HP

43. SEVERE WEATHER VERSUS FRONTAL TYPE

44. THE MOISTURE TONGUE DEFINED

45. (IN)STABILITY TYPES DEFINED

46. SEVERE WEATHER ENVIRONMENT

47. DOWNDRAFT TYPES: FORWARD FLANK AND REAR FLANK

48. VEERING AND BACKING WIND DEFINED

49. BAROTROPIC AND BAROCLINIC DEFINED

50. THE 3 MOTIONS WITHIN A TORNADO

51. VISIBILITY AND TORNADOES

52. RIISING AIR PROCESSES AND PRODUCTS

53. THE HYDROLAPSE DEFINED

54. LIFTED INDEX INFORMATION

55. SEVERE WEATHER ENHANCERS

56. VORTICITY BASICS

57. FLASH FLOOD THREAT

58. TILTING OF TROUGHS ON A HORIZONTAL PLANE

59. DEWPOINT AND WETBULB DETAILS

60. FORECAST MODEL DATA INPUT

61. SMALL SCALE PRESSURE CHANGES
62. THE HYDROSTATIC EQUATION
63. SMALL SCALE WEATHER INFLUENCES
64. GRAVITY WAVE DEFINED
65. WHAT IS DPVA?
66. INCREASING FORECASTING KNOWLEDGE
67. ATTRIBUTES OF A BROADCAST METEOROLOGIST
68. THE PURPOSE OF A FORECAST
69. THE ART OF FORECASTING
70. FORECAST VERIFICATION
71. THE WINTER PRECIPITATION FORECAST
72. CATCHY PHRASES FOR BROADCAST METEOROLOGISTS
73. CONVERSIONS USING THE DOMINANT TEMPERATURE SCALES
74. KNOTS, PLUS OTHER WIND INFORMATION
75. THE FUNDAMENTALS OF Z TIME
76. THE DIFFERENCE BETWEEN ISOBARS AND ISOHYPSSES
77. ASSESSING ATMOSPHERIC PRESSURES AND HEIGHTS
78. THE ISALLOBAR AND HEIGHT CHANGE CONTOURS
79. SURFACE VERSUS UPPER AIR STATION PLOTS
80. SNOW AND CLEAR SKIES
81. THE ART OF INTERPOLATION
82. LOCATING FRONTAL BOUNDARIES
83. USEFULNESS AND USELESSNESS OF RELATIVE HUMIDITY
84. THE IMPORTANCE OF EXPERIENCE AND BEING RESPECTED
85. WHAT CAUSES WIND?
86. MARITIME TROPICAL AIR MASS
87. MARITIME POLAR AIR MASS
88. DEDUCTIVE REASONING AND WEATHER FORECASTING
89. CONTINENTAL POLAR AIR MASS
90. CONTINENTAL TROPICAL AIR MASS
91. ARCTIC AIR MASS
92. HIGHLAND AIR MASS
93. TEACHING BASIC WEATHER
94. OCCLUDED FRONTS
95. USING MOS DATA
96. DYNAMIC SYNOPTIC SCALE RISING MOTION
97. THE 540 LINE AND PRECIPITATION TYPE
98. THE ZERO DEGREE ISOTHERM
99. THERMODYNAMIC INSTABILITY
100. RIDDING THE JET STREAM

[Click Here](#) for a quiz on Haby Hints 51 through 100

101. VERTICAL VELOCITY ON THE 700 MB MODEL PROGS
102. THE 1000 MB FORECAST MODEL PROG
103. THE 850 MB MODEL PROG
104. THE 500 MB MODEL PROG
105. THE RELATIVE HUMIDITY PROG
106. THE LIFTED INDEX PROG
107. THE SURFACE PRESSURE/PRECIPITATION/THICKNESS PROG
108. THE 300 MILLIBAR PROG
109. USING MODEL PROGS FOR FORECASTING
110. THE GFS MODEL
111. DOWNSLOPING WIND
112. UPSLOPING WIND
113. EVALUATING TROPOSPHERIC MOISTURE
114. APPLYING TROPOSPHERIC MOISTURE TO FORECASTING
115. ANALYZING A STRONG LOW PRESSURE ON MODEL PROGS
116. ISENTROPIC LIFTING (UPLIDE)
117. PET PEEVES AND BOTHERSOME METEOROLOGY
118. A LITTLE SUNSHINE MAKES A DIFFERENCE
119. CLOUDS ACT LIKE A BLANKET?
120. WHICH WAY IS UP?
121. WEATHER EXCITEMENT
122. THE DIFFERENT FORECAST MODELS
123. CHANGE IN PRESSURE, DENSITY AND TEMPERATURE WITH HEIGHT
124. MELTING OF HAIL AS IT FALLS
125. WHAT IS A DIRTY HIGH PRESSURE?
126. WHAT IS AN INVERTED TROUGH?
127. WHAT IS A "NEGATIVELY TILTED TROUGH"?
128. WHAT IS MEANT BY A "VERTICALLY TILTED TROUGH"?
129. WHAT IS A LEE-SIDE TROUGH (LOW)?
130. WHAT IS A THERMAL TROUGH (RIDGE)?
131. WHAT IS A SHORTWAVE TROUGH?

- 132. WHAT DO THE TERMS DIGGING AND DEEPENING MEAN?
- 133. WHAT IS A SHEAR AXIS?
- 134. WHY DOES SURFACE CONVERGENCE OCCUR WITH LOW PRESSURE?
- 135. WHAT IS A CLASSIC EVENT?
- 136. WHAT IS A RETURN FLOW?
- 137. WHAT IS OMEGA FORCING?
- 138. DEFINING CHART, PANEL, PROG, ANALYSIS, IMAGE, MODEL, ect.
- 139. RED SKY IN MORNING, SAILORS WARNING
- 140. WEATHER AND MILITARY STRATEGY

- 141. INGREDIENTS FOR THUNDERSTORMS AND SEVERE THUNDERSTORMS
- 142. SOME PERSPECTIVE ON GRAVITY
- 143. DIFFERENT TERMS FOR A CHANGE IN TEMPERATURE WITH HEIGHT
- 144. THE OMEGA BLOCK
- 145. NORTHERN HEMISPHERE MID-LATITUDE SEASONS
- 146. THUNDERSTORM OUTFLOW BOUNDARIES
- 147. CAPE AND LI USING GOES SOUNDER
- 148. READING THICKNESS LINES
- 149. HOW IS CONVERGENCE DISPLAYED ON THE GRAPHICAL MODELS?
- 150. WHAT IS A SQUALL LINE?

[Click Here](#) for a quiz on Haby Hints 100 through 150

- 151. FORCE FIELDS AND DONUT HOLES
- 152. WAA VS. LOCAL HEATING ON THE 850 MB FORECAST MODELS
- 153. THE JET STREAM AND SUPERCELLS
- 154. A WEATHER FOLKLORE PHRASE INTERPRETED
- 155. CARBON DIOXIDE VS. WATER VAPOR AS GREENHOUSE GASES
- 156. WHY DOES THE PGF POINT FROM HIGH TO LOW PRESSURE?
- 157. WHAT IS A VARIABLE WIND?
- 158. THE INVERSION
- 159. ZONAL AND MERIDIONAL FLOW
- 160. THE DIFFERENCE BETWEEN THE LCL AND CCL

- 161. WHY THE MALR IS NOT A CONSTANT?
- 162. POTENTIAL TEMPERATURE AND THETA-E
- 163. NEGATIVE BOUYANCY AND THE CAP ON SKEW-T
- 164. ELEVATED CONVECTION
- 165. THE EL AND MPL
- 166. PREDICTING HAIL WITH THE SKEW-T
- 167. PREDICTING WINTER WEATHER WITH THE SKEW-T
- 168. THE HYDROLAPSE
- 169. OPERATIONAL USES OF THE LAYER SLICE METHOD
- 170. SHORTCUT TO CALCULATING WET-BULB

- 171. THE COL
- 172. FORECASTING SEVERE WEATHER USING SKEW-T
- 173. SATURATION VS. ACTUAL MIXING RATIO
- 174. HURRICANE INDUCED TORNADOES
- 175. WIND SHEAR AND SUPERCELLS
- 176. EXACT LOCATION OF THUNDERSTORM DEVELOPMENT
- 177. THE STORM PREDICTION CENTER'S CONVECTIVE OUTLOOKS
- 178. THE REX BLOCK
- 179. USING PERCENTAGES IN FORECASTS
- 180. LOCATING DOWNSLOPING AND UPSLOPE WIND USING THE MODELS

- 181. READING FORECAST DISCUSSIONS
- 182. STAGES AND ATTAINMENT OF KNOWLEDGE
- 183. THE SOUND OF THUNDER
- 184. HOW DO CLOUDS DISSIPATE?
- 185. WHY DO MOST THUNDERSTORMS OCCUR IN LATE AFTERNOON?
- 186. CALCULATING RELATIVE HUMIDITY
- 187. WIDESPREAD VERSUS WIDELY SCATTERED
- 188. BOMBOGENESIS
- 189. CLOUD COVERAGE METHODS
- 190. EXPLAINING DEWPOINT AND RELATIVE HUMIDITY TO THE PUBLIC

- 191. THUNDERSTORM GLACIATION
- 192. WHY IS FOG MORE COMMON IN RURAL AREAS?
- 193. CALCULATING WINDSHEAR AND SHEAR VORTICITY
- 194. CALCULATION OF EARTH, SHEAR AND CURVATURE VORTICITY
- 195. INTERPRETATION OF UVV ON SYNOPTIC MODELS
- 196. EVAPORATIONAL COOLING
- 197. THE EFFECT OF VORTICITY ADVECTION ON HEIGHT CHANGE
- 198. THE VOLUME OF A RAINDROP
- 199. THE TEMPERATURE GRADIENT AND PRESSURE GRADIENT
- 200. THE CLOSED LOW

[Click Here](#) for a quiz on Haby Hints 150 through 200

- 201. SNOW AND ICE ACCUMULATION (GRASS VERSUS CONCRETE)
- 202. SNOW AND ICE ACCUMULATION (INFLUENCE OF PREVIOUS WEATHER)
- 203. SNOW AND ICE ACCUMULATION (DAY VERSUS NIGHT)
- 204. SNOW ACCUMULATION (INFLUENCE FROM TEMPERATURE PROFILE)
- 205. SNOW AND ICE ACCUMULATION (INTENSITY AND DURATION)
- 206. THE SLEET STORM
- 207. THE COOLING EFFECTS OF SURFACE SNOW COVER
- 208. THE RATE OF A SNOWFLAKE MELTING AS IT FALLS
- 209. TYPES OF ICE TO SCRAPE OFF THE CAR
- 210. THE RATE AT WHICH RAIN FREEZES IN A FREEZING RAIN EVENT

- 211. MELTING RATE OF A SNOWFLAKE (ON WATER VS. LAND)
- 212. THE LEVEL IN THE TROPOSPHERE WITH THE GREATEST HEIGHT FALLS
- 213. LENGTH OF DAY AND NIGHT AT THE EQUINOXES
- 214. CONVECTIVE INSTABILITY DEFINITION AND EXAMPLE
- 215. WHY THE SUN AND MOON LOOK BIGGER WHEN NEAR THE HORIZON
- 216. COMPARING THE DENSITY OF AIR TO WATER
- 217. DEFINING A "VORT MAX" AND A "VORT LOBE"
- 218. HOW QUICKLY CAN PRECIPITATION SATURATE THE AIR?
- 219. SUNBURN / TANNING MYTHS EXPOSED
- 220. WHY IS THE TEMPERATURE AT 32 F DURING WET SNOW?

- 221. RAPID MORNING BAROTROPIC WARMING
- 222. CAN IT BE TOO COLD TO SNOW?
- 223. OPERATIONAL INTERPRETATION OF 500 MB DPVA
- 224. RAINBOW TIDBITS
- 225. WHY CAN IT BE VERY COLD ON A SUNNY DAY?
- 226. HOW CAN TEMPERATURES WARM ON A CLOUDY DAY?
- 227. INTERPRETATION OF AVERAGE HIGH AND LOW TEMPERATURE
- 228. WHY DOESN'T GRAVITY PUSH CLOUDS TO THE GROUND?
- 229. WHO IS A METEOROLOGIST?
- 230. CAN ICE MELT WHEN THE AIR TEMPERATURE IS SUB-FREEZING?

- 231. RANGE FOLDING AND THE DOPPLER DILEMMA
- 232. WHICH PRECIPITATION TYPES ARE BEST DETECTED BY RADAR?
- 233. WHAT HAPPENS DURING VELOCITY ALIASING AND RANGE FOLDING
- 234. WHAT HAPPENS DURING DUCTING?
- 235. HOW DOES RADAR DETECT PRECIPITATION PARTICLES?
- 236. CAN RADAR DETECT A TORNADO?
- 237. RADAR CHARACTERISTICS OF SUPERCELLS
- 238. WHAT IS A HOOK ECHO?
- 239. WHAT IS THE RELEVANCE OF CLEAR AIR MODE?
- 240. RADAR RADIAL VELOCITY TYPES

- 241. WHAT IS THE DOPPLER SHIFT?
- 242. WHAT IS THE MEANING OF A TVS ICON?
- 243. WHAT IS BEAM SPREADING AND THE CONSEQUENCES?
- 244. WHY DO MID-LEVELS HAVE HIGHEST RADAR REFLECTIVITY?
- 245. WHAT IS SPECTRUM WIDTH?
- 246. WHAT IS THE DIFFERENCE BETWEEN ACCURACY AND PRECISION?
- 247. WHAT ARE ANOMALOUS PROPAGATION AND FALSE ECHOS?
- 248. WHAT IS ATTENUATION?
- 249. WHAT IS VIL (VERTICALLY INTEGRATED LIQUID)?
- 250. WHAT ARE RANGE, AZIMUTH, ELEVATION ANGLE AND ECHO HEIGHT?

[Click Here](#) for a quiz on Haby Hints 200 through 250

- 251. VALUE OF THE WIND CHILL INDEX
- 252. WHAT IS A "WHITE CHRISTMAS"?
- 253. WHY AREN'T COLD FRONTS AND CAA BOTH LIFTING MECHANISMS?
- 254. THE SIMPLIFIED OMEGA EQUATION (THERMAL ADVECTION TERM)
- 255. THE SIMPLIFIED OMEGA EQUATION (VORTICITY ADVECTION TERM)
- 256. JET STREAK WIND AND JET STREAK MOVEMENT
- 257. WHAT IS THE CONVECTIVE TEMPERATURE?
- 258. MODIFICATION OF A STAGNANT AIR MASS
- 259. PRECIPITATION EFFECT ON WET-BULBING OUT PROCESS
- 260. WHY IS MOIST AIR LESS DENSE THAN DRY AIR AT SAME TEMP?

- 261. WHAT CAUSES GIANT SNOWFLAKES?
- 262. THUNDERSTORMS AND FIRE
- 263. AN EXAMPLE OF COLD THICKNESS BIASING
- 264. WHEN ARE CELSIUS AND FAHRENHEIT THE SAME?
- 265. WEATHER WISHES VERSUS WEATHER REALITY
- 266. PRECIPITATION PROBABILITY BRAIN TEASER
- 267. DIFFERENCES BETWEEN ANALYZING WAA AND ISENTROPIC LIFT
- 268. WHY ARE TEMPERATURES COOLER IN RURAL AREAS?
- 269. WHAT IS AN ISOTHERMAL LAYER?
- 270. IRRELEVANCE OF SFC RH FOR PRECIPITATION PREDICTION

- 271. 10 POPULAR WEBSITES FOR REALTIME U.S. WEATHER DATA
- 272. HOW TO DETECT AND FORECAST VIRGA

[273. WHAT IS A BACK DOOR COLD FRONT?](#)
